LIST OF CLAIMS, SHOWING THE STATUS OF EACH CLAIM

Underlining denotes added text while strikethrough denotes deleted text.

IN THE CLAIMS:

1. (Previously Presented) A method of producing a transformed microorganism, comprising:
- (i) providing a competent microorganism, wherein said microorganism is a *Bacillus* sp;
 - (ii) producing a DNA construct *in vitro*, wherein said DNA construct comprises an incoming sequence of interest, flanked on each side by a homology box, wherein said homology boxes are flanked by non-homologous sequences which are non-critical targets for said microorganism to initiate uptake of said DNA construct; and
 - (iii) directly transforming said microorganism with said DNA construct such that the DNA construct becomes integrated into the chromosome of said microorganism.
2. (Cancelled)
3. (Cancelled)
4. (Previously Presented) The method of claim 1, wherein said *Bacillus* is a super-competent strain.
5. (Previously Presented) The method of claim 4, wherein said super-competent *Bacillus* is a PxyI-comK strain.
6. (Previously Presented) The method of claim 1, wherein said incoming sequence of said DNA construct comprises homologous DNA selected from the group consisting of wild-type, mutagenized and modified DNA.
